RESEARCH INTERESTS

International macroeconomics and finance, with a focus on sovereign debt, financial stability, and macro-financial linkages in resource-dependent emerging economies.

Dissertation (working title): "Essays on the Macro-Finance of a Post-Default Resource-Dependent Economy: Empirical Evidence from Zambia." The project comprises three modules: (1) sovereign debt restructuring, analyzed using an event-study and synthetic-control design; (2) transmission of commodity-price and exchange-rate shocks; and (3) banking-sector and digital-finance dynamics.
